DETAILED ACTION

Formal Matters

1. This application is in condition for allowance except for the following formal matters:
 - a. The **oath** or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

Specifically in the instant case, the oath filed 11/11/2004 contains incorrect foreign priority information (four occurrences, 31/January/2003 instead of 31/January/2004 as filed.

- b. Applicant is reminded of the proper language and format for an **abstract** of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In the instant case, replace “said” with “the” on line 2; “deep trenches a test” on line 3 should be “deep trenches. A test”; “deep trench With a test” on line 5 should be “deep trench. With a test”.

c. **Claim 1**, line 5 from the last line, “comprises)” should be “comprises”; **claim 14**, line 1, “claim9” should be “claim 9”.

d. **Figure 1** should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or render obvious an integrated circuit architecture with all exclusive limitations as recited in claims 1, 9, and 16, comprising a memory array having vertical FET selection transistors formed in active webs, a test structure integrated into the integrated circuit architecture, the test structure comprising, for forming a common connection of drain terminals of a plurality of vertical selection transistors, diagonally extended deep trenches filled with a conductive electrode material, formed between two adjacent laterally

offset vertical FET transistors, and buried strips forming drain electrodes of the vertical selection transistors at the intersection of the buried strip formed with the diagonally extended deep trench and the active webs.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicants should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

a. U.S. Patent 6,128,219 to Pio et al. discloses a test structure for a nonvolatile memory device.

Art Unit: 2818

b. U.S. Patent 6,339,228 to Iyer et al. discloses a structure for measurement of DRAM cell strap leakage.
